AQIB MEHMOOD

Python | AI/ML Engineer

+92 334 8344844 | devaqibmalik@gmail.com | linkedin.com/in/aqib-mehmood-malik

PROFESSIONAL SUMMARY

AI & ML Engineer with **2 years** of hands-on experience designing and building scalable, production-ready AI systems. Specialized in **Retrieval-Augmented Generation (RAG)**, **LLM integration**, **computer vision** and **automated workflows**, bridging the gap between business needs and technical execution. Experienced across the full development lifecycle, from training **models** in **TensorFlow, PyTorch** to deploying high-performance APIs with **FastAPI**, **Flask** and **Django**. Passionate about building intelligent **chatbots** and **AI-integrated** web platforms that improve user engagement.

EDUCATION

Bachelor of Science in Artificial Intelligence (BS-AI) | 2022 – 2026

Khwaja Fareed University of Engineering & Information Technology (KFUEIT), Rahim Yar Khan

- **Final Year Project – Liver Tumor Segmentation (Deep Learning):** Developed a V-Net-based deep learning model for automated liver tumor segmentation from CT scans using the LiTS dataset. Implemented the complete ML pipeline and integrated it with a Django application.

TECHNICAL SKILLS

Programming Languages: Python, Java, C++

Machine Learning & AI: Machine Learning, Deep Learning, NLP, Large Language Models (LLMs), Prompt Engineering, RAG, Computer Vision (YOLOv8, OpenCV)

ML/DL Techniques: Regression, Classification, CNNs, RNNs, LSTM, Image Segmentation (V-Net)

AI/ML Libraries: NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, NLTK

Backend & APIs: Django, Flask, FastAPI, REST APIs,

Web Scraping & Automation: BeautifulSoup, Selenium, Scrapy

Databases: MySQL, PostgreSQL, SupaBase, Qdrant, Pinecorn

Frontend: Bootstrap, Tailwind CSS, HTML, React

Tools & Platforms: Git, GitHub, Docker, Linux (CLI)

PROFESSIONAL EXPERIENCE

AI/ML Engineer

QIntellect Technologies, Rahim Yar Khan May 2026 – Sept 2026

- **Broiler Chicken Health Monitoring System:** Built a real-time computer vision system using YOLOv8 that monitors broiler chickens through cameras, detects healthy and sick birds based on activity and behavior, and tracks them through an admin dashboard for live poultry farm monitoring.
- **AI-Powered EDI Error Resolution System:** Built an LLM- and RAG-based automation system that analyzes failed EDI transactions from SAP/PRO to PartnerLinQ, resolves common errors automatically and resubmits transactions, reducing manual effort and improving processing efficiency.

Python Developer

Software Pattern, Islamabad Jan 2026 – May 2026

- **Business Contact Data Extraction:** Developed automated web scraping solutions using Scrapy, Selenium and BeautifulSoup to extract and process structured business contact data from multiple sources. Optimized data pipelines with cleaning, database integration and report generation to support lead generation and business analytics.

Python Developer

StepSharp Digital Pty Ltd (Remote) June 2025 – Sept 2025

- **AI-Codegen (OpenHands AI):** Contributed to a multi-agent AI chatbot platform by improving agent orchestration, state management and Docker runtime performance. Implemented Stripe payment integration and core platform features to improve scalability, subscriptions and overall user experience.
- **AI Baseball Recap System:** Developed an AI-powered system that processes team rosters and full game videos to automatically extract MVP highlights and generate a complete game summary with AI-driven commentary, delivering concise automated recaps for fans and analysts.

Python AI/ML Engineer

Freelance June 2024 – June 2025

- **QuickBooks API Integration (Intuit Developer Platform):** Built financial integrations with QuickBooks Online APIs to manage invoices, payments, customers and accounting data, using OAuth 2.0 authentication, webhooks and REST APIs in FastAPI for secure, production-ready deployments.
- **ApnaKarobar.co (Earning Platform):** Developed a Django-based platform with ad engagement, subscription management and automated daily profit distribution using Celery; implemented secure wallet/balance handling and package-based rewards; deployed with MySQL on cPanel.
- **Mental Health Chatbot:** Built a privacy-focused chatbot in Python and Flask offering mental health assessments, journaling, mindfulness support and SOS resources, integrated NLP with TensorFlow and NLTK, plus secure authentication and user management.
- **Face Detection Attendance System:** Developed a real-time facial recognition attendance system using Python, OpenCV and face recognition libraries, with image preprocessing, face encoding and Excel-based logging to automate student attendance.
- **Data Annotation for Deep Learning (Student Result Prediction):** Prepared and annotated large-scale educational datasets (student records, grades, subject-wise performance) for model training, maintaining data quality and consistency.

CERTIFICATIONS

- **AI Engineer Certificate**

LANGUAGES

- **Urdu-Proficient**
- **English-Proficient**
